A screenshot of the UTM application window. It shows a list of virtual machines: Ubuntu (selected), Kali Linux, Metasploitable, and Windows 7. The main panel displays the configuration for the 'Ubuntu' machine, which is currently stopped. The architecture is set to ARM64 (aarch64). The machine is named 'QEMU 7.2 ARM Virtual Machine (alias of virt-7.2) (virt)'. It has 3 GB of RAM and 8.44 GB of disk space. A large play button is centered in the main panel. The sidebar on the left lists Status, Architecture, Machine, Memory, Size, and Shared Directory. Under Shared Directory, there is a section for CD/DVD with a dropdown menu showing 'Downloads' and '(empty)'.
